ABOUT THE ART

This is not ordinary nature photography! The photographs are rare, special, unique, mysterious, full of wonder and only recently discovered!

All of the photos are of natural rock-art formations. The photos are not doctored or manipulated. Trick photography is not used. What you see in the photograph is what you will see if you were standing in person to witness the image as it exist in nature.

What is amazing is the incredible artistic work of nature to create images of such astounding detail in solid rock. The photographer has a rare talent of “artistic eyes” to discover these wonderful, yet hidden images that have silently existed for many thousands of years and are now being revealed for the very first time!

Example: millions of people visit Mt. Rushmore each year. They have never seen the Demon near George Washington, but it has been there all along, undiscovered! The same is true in Oatman, Arizona.

Some images are clear and easy to see for what they are, but many images also have a surprise; hidden images within the image! This makes the work of art even more amazing to behold to see not one, but two or more images in the same rock formation. Example: see Ten Commandments, AZ and The Great Sphinx, AZ. See our catalog for other dual images.

All of the images can be seen beside paved roads. No hiking or off-road travel required. Go to [James Russell Publishing.com](http://JamesRussellPublishing.com) to purchase the tour books that give you driving directions where you can see these wonderful images for yourself. This catalog contains a partial listing of high quality photos revealed in the tour guide books as well as other images not in the books.

You will enjoy showing people the fabulous images hanging on your wall... images the hand of God has created and is now revealed to mankind for the very first time! - *James Russell*
